

P500 – Texturizing Agent

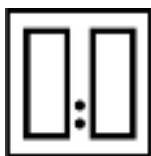

Product Description

Coarse particle size grades of micronized polypropylene for adding texture, structure and non-slip properties to a wide variety of paints and coatings.

Features & Benefits:

- Provides a consistent medium textured coatings surface.
- Tough, high molecular weight polypropylene gives good film durability.
- Easy to disperse powder that can be incorporated with high-speed mixing.

Product Application

3-10% on total formula weight

Wear suitable protection

Product Characteristics

Melting point:	160 - 170 °C (320- 338 °C)
Specific gravity:	0.89 kg/cm ³
Maximum particle size (µm):	149 (100 mesh)
Mean particle size (µm):	45.0-55.0
SDS:	Refer to the Safety Data Sheet
