

S201 – Blending Thinner

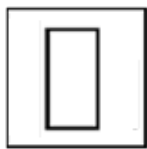

Product Description

This product has been developed to assist the painter in the blending out process of 2K Colours.

Suitable Substrates:

For Hyflow 2K systems

Product Application

500% to RTS mixture

- Activate, thin and apply 2k colors and clears in medium coats to opacity with no flash between coats.
- Empty the spray gun leaving little amount of activated paint or clear, with no flash off between coats, add 100% of S201, shake and apply in light to medium coats to melt down the overspray on the edges.
- Add another 200% of S201 to spray gun, shake and melt down the remaining overspray with light to medium coats.
- Finally , add S201 to emptied spray gun and apply to the rest of scuffed mat area.
- For spot repair start and finish with 1.5Bar.
- For normal blending keep the air pressure to 2 bar and reduce to 1.5 when applying the S201.

All application should be within the sanded/scuffed area.
